Terminal Blocks

The insulator housings of the standard PC series terminal blocks are made from PA66, a material that has excellent pliability and fire resistance. The blocks use the copper alloy pressure clamp connection system. It ensures long term protection from environmental factors such as salt mist and high humidity. Degson products are designed in accordance with IEC 60947, IEC 60079, UL1059, UL486E, CSA C22.2 No158 standards.

The standard mountings of the terminal blocks fit both the U-type NS35 and G-type NS32 rails. The current carriers are made from 99% copper. A wide range of accessories such as end covers, separating plates and brackets are also available. Fixed bridges in the terminal centre or insertion bridges in the clamping space are used in Power Distribution Systems. Uniform marking methods are used with the ZB marking system.

PC 2.5

Screw Terminals

| Part No. | Description | Marker |
|-----------------------|---------------------------------|-----------|
| DEG-PC2.5-01P-11-00AH | Din Rail Terminal Block (2.5mm) | ZB5 |
| DEG-PC4-01P-11-00AH | Din Rail Terminal Block (4mm) | ZB6 |
| DEG-PC6-01-P-11-00AH | Din Rail Terminal Block (6mm) | ZB8 |
| DEG-PC-16-01P-11-00AH | Din Rail Terminal Block (16mm) | ZB5 - ZB8 |
| DEG-PC35-01P-11-00AH | Din Rail Terminal Block (35mm) | ZB5 - ZB8 |
| DEG-PC50-01P-11-00AH | Din Rail Terminal Block (50mm) | ZB5 - ZB8 |
